EXECUTIVE SUMMARY

Dubai posted its second-best half-year ever in H1 2026 — and the healthiest signal is behavioral: ready homes outsold off-plan by value (AED 146.7B vs 139.8B) for the first time in years. Cash dominates: mortgages were only about a fifth of deal value (AED 102B of 419.9B). Cash buyers set the price in this market — and in high-supply corridors, they now negotiate from strength.

WHERE CASH IS DEPLOYING — AND WHERE IT ISN'T

Demand is softening hardest where supply is heaviest: Dubai South (-50% search demand YoY), Business Bay (-27%), JVC (-26%). Established, supply-constrained communities — Dubai Hills, Palm Jumeirah, Creek Harbour — are holding value. Cash wins in 2026 by buying scarcity, not brochures.

RESIDENCY & STRUCTURE

10-year Golden Visa requires property worth AED 2M+ (since Feb 2026, off-plan qualifies on the registered Oqood price — no minimum paid equity; mortgaged properties qualify with a bank NOC). Properties from AED 750K qualify for a 2-year renewable residence visa (Taskeen).

THE BOTTOM LINE

Zero tax, a USD-pegged currency, and a market that rewards buyers who do due diligence. H1 2026 favors cash buyers who target ready assets in supply-constrained corridors — and negotiate hard everywhere else.
